GENERATIVE AI

Use of Generative AI NOT permitted.

RATIONALE

This assessment task will assess the following learning outcome/s:

- be able to model complex business rules using Entity Relationship Diagrams (ERDs).
- be able to apply normalisation techniques to optimise a database design.
- be able to use complex Structured Query Language (SQL) commands to query a database.
- be able to research a recent development in the field of database technology.

MARKING CRITERIA AND STANDARDS

This assessment consists of 10 multiple choice questions. Each correct answer will score 0.5 marks. Marks will not be deducted for incorrect answers.

Marks will be given based on the correctness of the answers. The Test Centre will be marking automatically and you will receive marks according to the following criteria:

- HD - At least 85% answers were correct
- DI - At least 75% answers were correct
- CR - At least 65% answers were correct
- PS - At least 50% answers were correct
